GUIDE TO TOWING

SELECTING A TOW VEHICLE

TOWING TIPS

HITCHING BASICS

TRAILER-BRAKE CONTROLLERS

A Supplement to
**TRAILER
LIFE**

HOW TO USE THIS GUIDE

Tow ratings for all vehicle manufacturers are listed in alphabetical order, and are organized by model type and configuration. In most instances, you will find a letter (or a letter and number) that identifies the equipment the rating is based on, i.e., automatic or manual transmission, gear ratio, towing package, etc. You will find the meaning for each of these letters in the "Key to Charts" section on page 18.

If there is no letter after the rating, that means there is only one rating available. Likewise, you may find the word "all" in the engine column; that means all available engines are capable of that particular tow rating.

Because each manufacturer lists its vehicles

differently, we have found it necessary to make some changes in an effort to keep this guide consistent and concise. For example, Ram trucks are listed with tow ratings depending on transmission type and axle. Ford distinguishes between conventional and fifth-wheel trailer towing. In the GM section, you'll note that some models have two tow ratings separated by a slash; the first rating is for conventional towing, the second is for fifth-wheel towing.

Where applicable, we've also included relevant manufacturer's notes for a particular vehicle or model line, but always check with your dealer for details on the model you plan to purchase, including tow rating, payload capacity, gross vehicle weight rating (GVWR), gross combination weight rating (GCWR) and gross axle weight rating (GAWR). 🚚
